

We've completed over hundreds successful projects and have clientage in Europe, Canada & U.S.A

### Resource Map WordPress Plugin **Executive Summary**

We were tasked to craft a solution that allow the organisation and different team within that organisation to track their travel routes, destinations & moving convoys! The purpose of this system is to make the Travelling in group more fun & easy when they wanted and find other members if you're lost. Not only members of the community can track real time location but can also do the

following Destinations/Locations for hangout Find other members near you

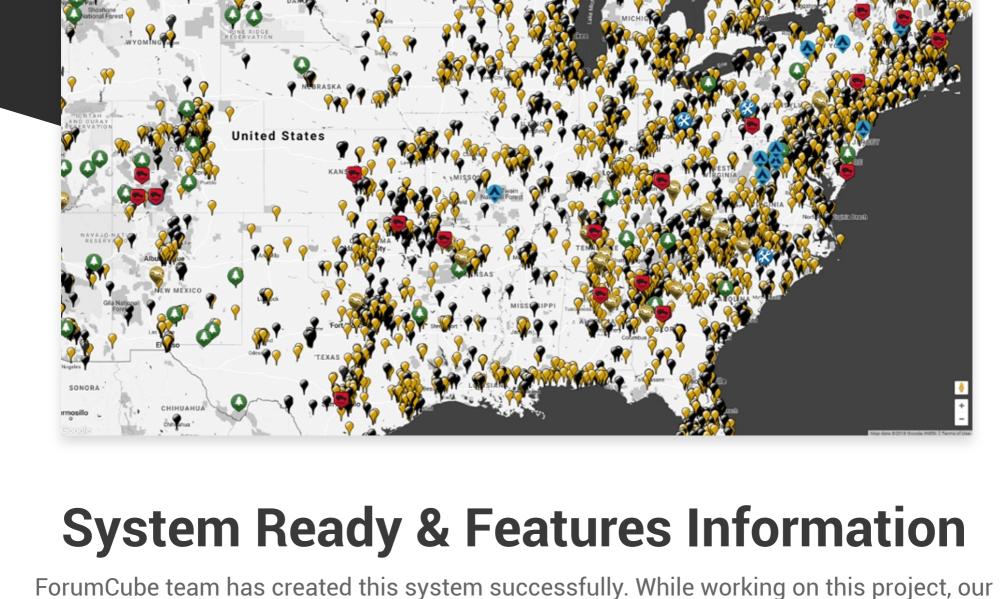

Organize Outdoor Events

# no clear path or system to look at for making this happen. Our client roughly knew what

As this was pretty new idea and when client first started to discuss this thing there was

he wanted but our team were tasked to first draft those imaginations & ideas into paper. Initially we were just asked to have map with outdoor destinations where his users can go and explore. For this purpose they needed a manual and CSV location upload feature because Overland Bound associated with thousands of location scout members and they always try to find best location to hangout and these locations constantly updated on the location map. As the project progressed and everybody onboard started to see the positive results, client requested us to add move community and interactive features for making the travel more fun & social for his members.

### interest and search near your location. Have a look to some part of this exciting process below:
